

Andy Narayanan

MyCelx Technologies Corporation

Andy Narayanan is Director of Global Technical Solutions and Key Accounts. Andy works with customers globally providing optimized oil removal solutions for their existing treatment trains or new water treatment requirements. Andy focusses on developing customer relationship with National Oil Companies and super majors.

Andy provides solutions through continuous engagement with the customer utilizing proprietary water characterization techniques. Andy's role is to work with customers them in charting out the optimized water treatment solutions. He works with the customer from initial inquiry stage to the implementation and integration of solution with the existing process.

He joined MYCELX in 2003 to assist R&D activities and new products development. On the business development side he was involved in developing literature with compelling marketing, technological and engineering information to the customer. He also focusses in developing contacts and guiding them through execution of specific projects in water filtration in multiple industries.

Andy has worked with more than 300 customers globally in multiple industries in implementing customized solutions.

Andy has Bachelors as well as Masters in Chemical Engineering with an experience of about 16 years in water filtration and petrochemical industries. He is member of AFS, SNAME, AIChE and SPE.
