

## **Min Tang**

### **University of Minnesota**

Mr. Min Tang got his bachelor degree with the major of Pulp and Papermaking Engineering from South China University of Technology. In 2010, he continued his study as a Master student and later a PhD student in the research team of High Performance Fiber and Paper-based Composite Material. He has involved in many projects about high efficiency air filtration, liquid filtration and coalescing applications. His research area includes fiber materials, reinforced polymer, wet-laid process & equipment, and filtration test. Currently, he is the postdoctoral associate in Particle Technology Laboratory, University of Minnesota-twin cities campus.
